STG - (A) United States patent
AB - A transmission job originating station for controlling transmission of
job information, based on the processing of a print job in a printing
system, is provided. The control system includes a document generating
subsystem for providing at least a portion of the print job to be
delivered to a print machine and a user interface for programming a
set of information including one or more confirmation destinations
with each confirmation destination being disposed remotely of the
transmission job originating station. The transmission job originating
station further includes a control subsystem which, in response to the
processing of at least a portion of the print job at the printing
machine, reads the set of information and determines each confirmation
destination, programmed with the user interface, to which the job
information is to be transmitted.
